Professional Grade Audio Equalisation for Amateur Radio

DSP noise cancellation specialist bhi have just launched their new ParaPro EQ20 range of audio DSP products. The ParaPro EQ20 range feature a 20W modular audio power amplifier with a parametric equaliser plus the option of having bhi's latest dual Channel DSP noise cancelling technology and Bluetooth technology. The parametric equaliser allows any specific part of the frequency range to be selected and adjusted in strength. The user is able to precisely select a frequency to boost or cut to suit your own hearing and environment. You can use the cut function to reduce problematic frequencies in order to expose the frequencies you want, which typically makes for a warmer, less harsh result, or you can boost specific frequencies to obtain more clarity and intelligibility. The EQ20 range can be used with you own passive speaker/speakers and is supplied with a user manual and full accessory kit to suit most types of connection. For more information go to www.bhi-ltd.com or call bhi on 01444870333.

bhi ParaPro EQ20 Audio DSP Range Features:

- Parametric equaliser lets you shape the audio to suit your own hearing
- 10W audio per channel
